[HOW TO MERGE PDF FILES WITH AUTOSPLIT]

### What Software Do I Need?

The AutoSplit software requires a full version of Adobe Acrobat Standard or Professional for Microsoft Windows. It will not work with a free Acrobat Reader software that does not allow document editing and modification. The plug-in supports all versions of Adobe Acrobat starting from version 6. You can download a free 30 days trial version of AutoSplit from <http://www.evermap.com/autosplit.asp>. If you do not currently own a copy of Adobe® Acrobat® then you can download a trial version from <http://www.adobe.com/downloads>. The AutoSplit software, once installed, adds several menus to the "Plug-ins" menu in Adobe Acrobat. The AutoSplit is available in two versions: *Standard* and *Professional*. It is recommended to download and evaluate a Professional version in order to get a complete overview of the product capabilities.

### What Is Document Merging?

Document merging is an operation that combines several documents into one or more composite PDF document(s).

### What Merging Methods Are Available?

The AutoSplit software supports the following document merging methods:

- Merging documents from one or more folders into a single PDF file
- Merging documents from multiple folders into multiple PDF files
- Merging documents based on filename similarity
- Document merging by using a custom control file
- Updating multiple documents by inserting and/or replacing pages

### What Documents Can Be Merged?

The AutoSplit software can merge the following common types of documents:

- PDF documents
- Microsoft Office documents such as Word, Excel and PowerPoint
- All image files supported by Adobe Acrobat such as TIFF, JPG, BMP and etc.
- HTML files
- Text files (\*.txt)
- AutoCAD drawing files (if Adobe Acrobat has appropriate file format converter installed)
- Postscript files (\*.ps, \*.prn, \*.eps)
